

Profile

Personal Information

Name Kipkorir, Allan *Kipchumba*
Preferred Name Allan
Sex, Birthdate Male, 09/27/1997

Contact Details

Email, Phone koriralank@gmail.com, +254.791301050, Mobile, +254.722703787, Mobile
Permanent Address P.O BOX 3642 Nairobi, 00200, KEN

Demographics

Religion Other - Christian Catholic
Military Status None
Hispanic or Latino No
Race Black or African American (Africa)

Language

English Speak, Read, Write
Swahili First Language, Speak, Read, Write, Spoken at Home
Other, Kalenjin Speak, Spoken at Home

Geography & Citizenship

Citizenship Status Other (Non-US)
Birthplace Nairobi, Kenya (0 Years US, 19 Years Non-US)
Other Citizenships Kenya
Current US Visa None
Intended US Visa F-1 Student

CA Fee Waiver

Fee Waiver Requested

Yes, Signed: Allan Korir

My family receives public assistance

I can provide a supporting statement from a school official, college access counselor, financial aid officer, or community leader

Family

Household

Parents	Married
Home	Both Parents

Parent 1

Father

Name	Mr. David K Kiplagat
Birthplace	Kenya
Email, Phone	kiplagat@kiplagat.co.ke, +254.722703787, Mobile
Address	the same as my home address
Occupation	Lawyer (attorney) or judge, Self-Employed
Education	Graduated from college/university Law (1992), University of Nairobi, Nairobi, KEN

Parent 2

Mother

Name	Dr. Dorcas J Kiplagat
Birthplace	Kenya
Email, Phone	+254.706545745, Mobile
Address	the same as my home address
Occupation	Social, welfare, or recreation worker, Employed, Network and Programs Coordinator, Arigatou International
Education	Graduate school Bachelors (1994), Kenyatta University, KEN Doctorate (2010), Catholic University Of East Africa, Nairobi, KEN

Siblings

1. Collins K Korir, Age 21, Brother, Some college/university, Bachelors, (01/2014 - 12/2017), **Strathmore University, Nairobi, KEN**
2. Theo K Korir, Age 19, Brother, Some college/university, Bachelors, (08/2016 - 08/2020), **University of Pennsylvania, Philadelphia, PA, USA**
3. Felix K Korir, Age 13, Brother, Some high/secondary school
4. Jesse K Korir, Age 10, Brother, Some grade/primary school

Education

Current or Most Recent School

Nairobi School, Nairobi, KEN, Public (01/2012 - 11/2015)

Counselor Mr. Wircliffe Mutindwa, Mathematics teacher
Email, Phone wircliffe.mutindwa@gmail.com, +254.0706158069
Boarding School Yes: Living at School
Interruption No interruption to report
Graduation Date 11/2015

Other Colleges & Universities

School Shang Tao Media Arts College, Nairobi, Nairobi, KEN Course taught on college campus (01/2016 - 04/2016)

Community-Based Organizations

Other, Education and Social Empowerment Program

Counselor Ms. Janet Heinonen, Deputy Chair
Email, Phone easepkenya@gmail.com, +1.541-868-5896

Grades

Rank Top 10% / 300, Unweighted

Current or Most Recent Year Courses

First Trimester	Second Trimester	Third Trimester

Activities

Student Govt./Politics

11, 12	House Prefect(11),House Captain(12)
School	Led the house towards achieving academic goals,winning sports days and swimming galas,solving problems among house members.In charge of house property
7 hr/wk, 40 wk/yr	
Continue	

Other Club/Activity

11, 12	Assistant Captain,School soccer team
School	Facilitated daily soccer practice and led the team towards winning trophies in various competitions including the county and regional levels
12 hr/wk, 35 wk/yr	
Continue	

Environmental

11, 12	Vice Chairman of Nairobi School Environmental Club
School	Helped organize environmental workshops,introduce a new efficient system of recycling waste,and managed a system of school compound cleaning.
5 hr/wk, 40 wk/yr	

Community Service (Volunteer)

10, 11, 12	Coordinator,Annual Safaricom Diabetes Walk
School	Led students to participate in the Diabetes Walk .We raised about 40,000ksh in each of the three years ;The money went to diabetes management.
4 hr/wk, 8 wk/yr	
Continue	

Journalism/Publication

PG	Created a blog , www.fierypenblog.wordpress.com
Year	Creative writing: Written a number of interesting articles and pieces,with my audience growing daily.
4 hr/wk, 2 wk/yr	
Continue	

Religious

PG	Secretary, Youth group Holy Trinity Church, Kileleshwa
Year	Organized youth forums, activities and vacations. Also held activities that earned funds for the church such as car washes and book sales
4 hr/wk, 30 wk/yr	
Continue	

Other Club/Activity

9, 10	Librarian, Nairobi School
School	Assisted the librarian in arranging the library books, lending books, and updating book catalogues. I got a certificate of appreciation.
6 hr/wk, 40 wk/yr	
Continue	

Research

PG	Member, Education and Social Empowerment Program
Year	Did needs assessment in Nandi Hills, a small town. We researched on work conditions in industries such as service and documented their problems.
10 hr/wk, 1 wk/yr	
Continue	

Other Club/Activity

9, 10, 11	Team Leader, Scouts Club
School	Organized trips, drills, excursions, marched during functions and cleaned the school. Also led club members in facilitating fund raisers for the needy.
5 hr/wk, 35 wk/yr	

Art

PG	Member, Shang Tao Media Arts
Year	Learnt the art of 3d Animation, where we made 3d models, animated objects and helped our teachers (professionals) in their money-making projects.
25 hr/wk, 16 wk/yr	
Continue	

Writing

Personal Essay

Some students have a background, identity, interest, or talent that is so meaningful they believe their application would be incomplete without it. If this sounds like you, then please share your story.

My mind wandered past the lighthearted teases and the unending banter, and for the first time in my life, I fully appreciated the shared moment. This night I opened my eyes to the unseen side of a family meal.

My father sat comfortably at one end of the small dinner table; his partially traditional self would not allow him to squeeze with the rest of us on the other side of the table. The food he savored did not stop him from talking to us, at length, of how “the children of these days are rotten”, and how during their time “the cane” worked wonders in keeping their discipline in check. He then went on to give us advice about life, something he religiously did to a point of predictability. I, however, agreed with my introspective mind, that I would be nowhere without the uncountable words and ‘more than necessary’ life advice I had heard from him. My mind momentarily snapped from its trance, and I heard mother joke that it would be father’s turn to do the dishes that evening, and as expected, he quipped with something in the lines of ‘I don’t even know where the kitchen is’. The traditional and conservative beliefs we may not share, but his impact on my life has been immeasurable. Courage, self-belief, resilience, hard work, honesty, frankness and even humor are traits that have become aspects of my character, all of which I learnt from looking up to him.

I turned my gaze to my mother, who sat beside me. She wore a constant smile across her face. She seemed less interested in the food, which in fact she prepared, and was more engaged in the conversation. My mother is a remarkably generous lady. I remember of times she would come with strangers to our house. I later came to learn that these ‘strangers’ ,were child soldiers who had escaped from their camps in Uganda and South Sudan. Mother had a heart big enough to house them as they sought out plans to return to their homes. This selfless act, together with several others, taught me generosity. She made me believe that the mere fact of us being humans meant we ought to help wherever and whenever possible. I thought of the nonpareil admiration I had for her, and how I would not have been half as generous or half as modest without her.

My attention drifted to my two smaller brothers. I wasn’t surprised that they were having a petty argument about something. My parents were wise not to interfere, for they would ultimately manage to make up, and they did. The next minute saw them laughing at an inside joke. I admired how they lived in the present; how they put their problems behind them like their lives were one smooth ride. Their smiles and laughs had a spectacular way of spreading the positive energy. My elder brothers on the other hand, were the complete opposite: calm and collected. They most certainly had many things I their minds, but they esteemed family meal time and contributed to the merry. Maybe life is what we make it to be?

I was startled from my introspection by my mother, who wanted to know why I had been very quiet. I thought of telling them how much they were of significance to my life, and that they had been the lifeblood of my existence. That I would not have been as virtuous without them. That I would not have been as achieved, or as goal-oriented, were they not present in my life. I wanted to tell them of how much I had learnt from them throughout my lifetime, and that in another life I would ask for no other family. But I could only find the words to say I enjoyed the meal.

Additional Information

AUTOBIOGRAPHY

I was born in 1997 at a place called Buruburu in Nairobi. I am the third born in a family of five children, all of whom are boys. My father is a lawyer based in Nairobi while my mother works for an NGO advocating for peace. My four

brothers are all in various institutions of learning, like me, striving to carve a future out of all the resources laid before them.

Ours is a close-knit family, one that shares experiences and meals together. My siblings and I are all extremely different individuals, but if asked of a commonality, it would be our drive and generosity, something we learnt early on from our parents. My mother would invite child soldiers that escaped from South Sudan who she had met during her peace-keeping missions to share a house with us. This selfless act reminds me every day that I am morally obliged to help those in need. My father and mother were fortunate to have parents who believed in the paramountcy of education, both graduating from various universities in Kenya. My mother was especially lucky, for she got an education at a time when many local conservatives had their doubts on female education.

We lived in Buruburu, a middle-income suburb in Nairobi, for five years. Despite the privilege we had of having electricity in the housing estates, living conditions were tough and insecurity was a menace. Tapped water was just a fancy name the city council used to refer to the intermittent water supply we experienced. We later on moved to a better area of the city that was much safer and bearable: Westlands.

I joined a small local nursery school where, for the first time in my life, I felt comfortable being around people who weren't family. I later joined St. Mary's School and my mind was blown by its enormity. The transition to this new school was smooth and I quickly fit in. I would later spend the first three years of my primary school life in the school. I joined Busara Forest View Academy, a boarding school in Nyandarua County, in 2007. Boarding school taught me independence, that I could survive just as well with my parents 250 kilometers away. I was second place in the county in the national KCPE examinations. Seeing my name in the front page of the newspapers made me realize that I could as well achieve anything I set my eyes, mind and heart to.

I managed to join Nairobi School, a prestigious national school. Here, I nurtured my leadership skills, having being a prefect since Form One. My most challenging leadership tenure was in Form Four where I was a house captain. Despite the challenges, I learned a lot about people, and what drives them.

Discipline & School Interruption

Education Interruption

No interruption to report

Have you ever been found responsible for a disciplinary violation at any educational institution you have attended from the 9th grade (or the international equivalent) forward, whether related to academic misconduct or behavioral misconduct, that resulted in a disciplinary action?

No

Have you ever been adjudicated guilty or convicted of a misdemeanor or felony?

No

Princeton University Member Page

General

Preferred start term Preferred: Fall 2017

Admission plan Restrictive Early Action

Princeton-specific Fee Waiver Not Applicable

Financial aid Yes

To submit an optional art supplement, please see: No

https://puwebp.princeton.edu/UA-Art-Web/. Do you plan to submit one to Princeton University?

Academics

Which degree would you most likely pursue at Princeton? Your choice is not binding in any way:

B.S.E.

In which program of study do you think you would like to major at Princeton? Your choice is not binding in any way:

Electrical Engineering

BSE Engineering

My mind marvels not at nature, but what man can harness from it. Ever since I was a child, I had a knack for science and math. I remember opening up a radio device in the hope of finding out what made it 'speak'. I was disappointed to find a magnet and intricate wiring. This only fed my curiosity. I somehow managed to get a physics book which enlightened me that 'radio' was not just a device but a form of electromagnetic wave. I knew too well that there was more to the device than that, and everything- just like the radio- bares more than meets the eye. This desire to see beyond what the eyes see fuels my predisposition for engineering .

The concept of getting an idea then churning it into reality endears me greatly. The unparalleled physical and intellectual resources at the Princeton University School of Engineering and Applied Sciences would provide me with a platform to think of new ideas, build up on existent ones and even come up with world-saving solutions to the many global problems we face. The junior paper and senior thesis, which are unique to Princeton University, will give me a head-start and an early feel of the field, and also boost my confidence in the understanding of the

current world problems.

I intend to return as a Princeton graduate and engineering expert to solve the problems we face as countries of the third world. Electricity, for instance, is a luxury for the chosen few; Installed grid-based capacity in sub-Saharan Africa is around 90 gigawatts, which is less than the capacity in South Korea (The population in South Korea is only 5% that of sub-Saharan Africa). If the same trend is followed, it would take Africa until 2080 to achieve universal access to electricity. These are some of the problems that unsettle my mind and I feel obliged, as an intellectually gifted individual, to do something about the situation. We may have begun as a 'dark continent', but we have what it takes to see the light. I hope to use the accumulated knowledge I would have acquired from Princeton's engineering programs to start up an engineering firm that values the pillars of integrity and selflessness, employ hundreds of people therefore lower unemployment rates and increase national access to amenities such as electricity and clean water.

I compare the thrill of solving a problem to the feeling of satisfaction after placing the last piece on a complex jigsaw puzzle, and I intend to solve a multitude of puzzles. I eagerly await the day I will join fellow engineers from Princeton Racing Electric in designing a sustainable race car, in preparation for a world in dire need of problem-solvers. I believe the Princeton University School of Engineering and Applied Sciences would fully equip me with the skills needed to bring change to the world, and especially to the developing countries that lag far behind.

In which second program of study do you think you would like to major at Princeton? Your choice is not binding in any way: Architecture

In addition to the major you noted above, please indicate which certificate program might interest you: Musical Performance

In addition to the major you noted above, please indicate which second choice certificate program might interest you: Creative Writing
