

Cornell CALS

Few tips.

- **Agricultural knowledge**..being a Land grant university, Cornell has a lot to give back to the global community in the field of Agriculture. Having grown on a farm,some knowledge in agriculture or aspirations in agriculture is highly appreciated at CALS. Regardless of the Major you've to give some agricultural story in their supplements.
- **Personal story**....tell a unique and personal story in the why major why school Essay. Being a combination of the two,you need to plan ahead. The plot is simple,,,,a personal backstory,how you attempted solving it in your own chaotic ways then relate it to a research or program at CALS that helps solve your issue. Mention a professor in that field.
- **Education for reasons beyond yourself**..... Tell them how you'll utilize the education you get in solving problems in the world and probably back home. How you can solve third world problems in line with your passion.
- **Interdisciplinary approach**...with the Any Study perspective, show how you'll utilize it by having two majors or a major and a minor. If they're in line it's a Plus. However, they'll appreciate any.
- **Utilizing their resources**.... Tell them how their resources and research opportunities will help you in your education. They have both individual and group research.
- **Mental stability**..... However awkward it sounds, Cornell appreciates people who can manage dealing with the almost 5000 freshmen and also maneuver the curriculum.
- **Clean energy**,...if you've a way of touching on this in your app it's a plus. Maybe have an activity on clean energy. They're big on that.
- **Community involvement**.... They highly value community winvolvement. They'll allow you to define a community in your own way and write about it in 300 words. Show the context so that it still maintains your unique and personal story.
- **Academics**.... A good highschool record is appreciated. Not necessarily your rank but a good transcript. **SAT isn't required**...unless they change in future.
- **Innovation and creativity**... have creative solutions to real world problems.
- **Deep involvement in your major and related field** .. you can add on this using the gap year. You can talk of internships and so.
- **No need for flowery writing**.... Don't beat around the bush.
- **They don't track demonstrated interest**.... Cornell in general doesn't.

Finally it's about you and Cornell.Believe in yourself. You got this!!
