18TH/OCTOBER/2023

SUBJECT: Recommendation for College Admission for Tony Odhiambo

It is with great pleasure that I write this recommendation for Tony Odhiambo in support of his application. I have known Tony for two years as a contestant in the Kenya Mathematical Olympiad and as a member of the Kenya team to the International Mathematical Olympiad, the Pan African Mathematical Olympiad and the East African mathematical Olympiad.

Tony is a very intelligent individual with excellent mathematical aptitude. He has qualified for two years in a row to represent Kenya at the International Mathematical Olympiad and the International Mathematical Olympiad. This is out of over 7000 participants countrywide.

I have coached him on Olympiad mathematics and he consistently displays a very high aptitude as well as a good team player. He won a gold medal at the first edition of the East African Mathematical Olympiad 2023, and a silver medal at the Pan African Mathematical Olympiad in 2023. These are very remarkable achievements and therefore make him a top ranking student on the African Continent. He was also the top student in this years Kenya Mathematical Olympiad (2023) and will be representing Kenya at the International Mathematical Olympiad and the Pan African Mathematical Olympiad in 2024.

Tony will benefit greatly from learning in an environment that will enable him to explore his full potential. I am confident that he will be among the top performers in his cohort. I highly recommend him for a full scholarship and admission to his preferred program at your institution.
